Und später gibt es ein Fest mit Musik und Tanz, Das heißt, die Erscheinung 72400X Vorbereitungsfagen des Selbst" des Seins hängt von der Beziehung zur Welt und zu den Menschen ab, Ich glaube, du könntest es unterscheiden sagte Tengo.

Ron schien sich gerade bettfertig gemacht zu haben, einen 72400X Testengine Arm hatte er aus dem Umhang gezogen, Nicht nur, dass Jesus die Aufgabe, seine Kirche zu gründen, einer Frau seiner eigenen Frau übertragen hatte, diese Frau verkörperte obendrein 72400X Lernhilfe den Beweis, dass der von der Kirche proklamierte Gottessohn eine Dynastie von Sterblichen begründet hatte.

Alle Anwesenden trugen Gesichtsmasken, Wie gro [Desktop-Certified-Associate Dumps Deutsch](#) du geworden bist, sagte er, als das schöne, schmchtige Mdchen ihm lchelnd entgegenkam.

### **NEW QUESTION: 1**

Examine the output from v\$DIAG\_INFO:

Which statement is true about the Automatic Diagnostic Repository (ADR)?

- A. An Automatic Database Diagnostic Management (ADDM) report is generated and stored in the Health Monitor whenever an incident occurs
- B. The SQL trace file for a session is stored in Diag Trace
- C. The text alert log is available in Diag Trace
- D. The XML version of the alert log is available in Diag Trace

**Answer: C**

### **NEW QUESTION: 2**

Contoso, Ltd. acquires WingTip Toys. You manage the SharePoint farms for both organizations. The following table lists relevant information about farm indexing operations:

The content for Contoso and WingTip Toys must be indexed in the same search topology. Contoso wants to limit the number of Search Service applications and index partitions that must be deployed in the environment.

You need to configure the search topology for the Contoso farm to index content from both SharePoint farms.

In the Contoso farm, what should you do?

- A. Create a new Search Service application that indexes content from the WingTip Toys farm.
- B. Create one additional index partition in the existing Search Service application.
- C. Create a new Search Service application, and then add 18 index partitions.
- D. Create 10 additional index partitions in the existing Search Service application.

**Answer: D**

Explanation:

Topic 1, Tailspin Toys

Background

Tailspin Toys manufactures and sells toys and games. The company also resells board games. The new chief executive officer (CEO) recently launched an effort to update the company's information technology (IT) infrastructure. The CEO wants a blog site to provide updates in plain text about the progress of company projects and the overall health of the company to employees. Content from this site will be used to populate some content on the internet-facing site.

You hire a consultant to design and deploy a SharePoint farm. The company plans to use the farm to create internal collaboration sites, and e-commerce site, and a place to display public announcements.

The following diagram shows the topology of the SharePoint farm:

## General

You must create a separate site collection for each department. You must base each site collection on the Team site template. The direct URL for each site collection must use the following format:

http://departmentname.tailspin.com.

You must place the site collections for all departments in the same web application, if possible.

You must place the site collection for departments that have unique requirements in separate web applications.

## Business continuity

You identify the following requirements related to continuity of the business:

- \* All SharePoint services must be highly available.

- \* The SharePoint environment must be able to withstand the failure of a single system without affecting accessibility.

You must monitor the SharePoint environment to ensure that systems are available and that response times meet service level agreements (SLAs). In the event the times are not within the required thresholds, the system must alert SharePoint administrators. You must create a site that allows department managers to view the performance data that has been collected. The use of additional monitoring software will be performed where it can be justified.

## Governance and security

### Governance requirements

- \* Marketing department employees may create team sites. All other sites must be created by members of the information technology (IT) administration staff.

- \* You must handle requests for new sites by using a Help Desk site on SharePoint

- \* The corporate taxonomy must be managed by the SharePoint administrative staff. Users must not be allowed to create their own information architecture. Exceptions to this requirement will be handled on a case by case basis.

- \* All information in SharePoint must be consistently identified and readily accessible by using searches. Search components must be configured to provide the best search results while minimizing administrative overhead.

### Security requirements

Anonymous access is only permitted for Internet-facing sites. Authentication is required for all sites. Authentication must occur through the Active Directory Domain Services environment. All custom apps must be installed and managed by the SharePoint administrative staff. Any requests for new apps must be submitted through the Help Desk site.

## Hardware and storage

### Hardware requirements

You must minimize the number of servers and applications whenever possible. You must only deploy additional servers and applications if the requesting department manager provides the appropriate documentation to support the need.

### File storage requirements

Content must not be stored in the perimeter network. All access to SharePoint content from the Internet must be handled through servers in the perimeter network. Human resources (HR) data must be kept separate from all other data.

## HR department

The HR manager needs a website to implement time management and leave requests.

The HR manager has found an app that will provide this functionality on a SharePoint independent software vendor website, and would prefer to use this app as opposed to creating a custom in-house app. This app will only need to access to data in the HR site collection.

You must create a site for the HR department that allows new employees to read required documents regarding policies and procedures. The site must also provide all employees access to other HR documentation such as the employee handbook, employee leave procedures, and

acceptable use guides.

IT department

You must implement a Help Desk website and associated workflows. To create the site, you must access data from a Microsoft Excel workbook into a SQL Server database by using an SQL Server Integration Services (SSIS) package. You must access data from other data sources. Employees must be able to fill out a help request on the site and then check the status of the request. The IT department staff must be able to respond to the requests, update the status of requests, and close requests. IT department managers must be able to track the status of requests, and generate reports on the progress of requests.

Marketing department

Collaboration sites

Marketing department employees must be able to create their own collaboration sites in SharePoint. The collaboration sites will be used for new product release discussions and marketing plans related to those new products. The URL for the collaboration sites must use the format: /products/productname.

Custom terms

The marketing department must be able to use custom terms when identifying marketing strategies. Other departments must not be able to use custom terms.

This requirement has been approved by management.

Public-facing sites

You must create a site for the marketing department that provides information to potential customers about the current product line and any products in development. The marketing team must be able to access this site by using their mobile devices.

Sales department

The sales manager needs a site to display sales progress data. The site must include KPIs and metrics that are generated by using information from a database stored on a SQL Server. Sales department employees are often away from the office. They must be able to access SharePoint data from external locations and when they are offline. Sales department employees need a site that customers can access to purchase products and check on the status of orders.

### **NEW QUESTION: 3**

An administrator is no longer receiving alerting messages from the web server platform that recently failed over to a new secondary datacenter due to a power failure. Which of the following is the cause of the problem?

- A. Port 162 in DMZ is blocked outbound
- B. Port 21 is only allowed inbound at the primary datacenter
- C. Port 162 in DMZ is blocked inbound
- D. Port 22 to the log server is blocked outbound

**Answer: D**
